The transportation planning for a single Freight Unit is the simplest way of planning transportation. Selecting a single FU will have Umoja generate Transportation Proposals with Stages/Lanes for the specific Route found between Loading Location and Unloading Location.

Transportation Proposals are organized in the following way:

Transportation Proposal Number:

- Identifies one of the proposals generated by TM

Freight Unit Number:

- Identifies the Freight Unit being planned

Stages/Lanes + Means of Transport:

- Identifies the number of “connections” between Source and Destination as well as the Means of Transport associated to each connection

Route:

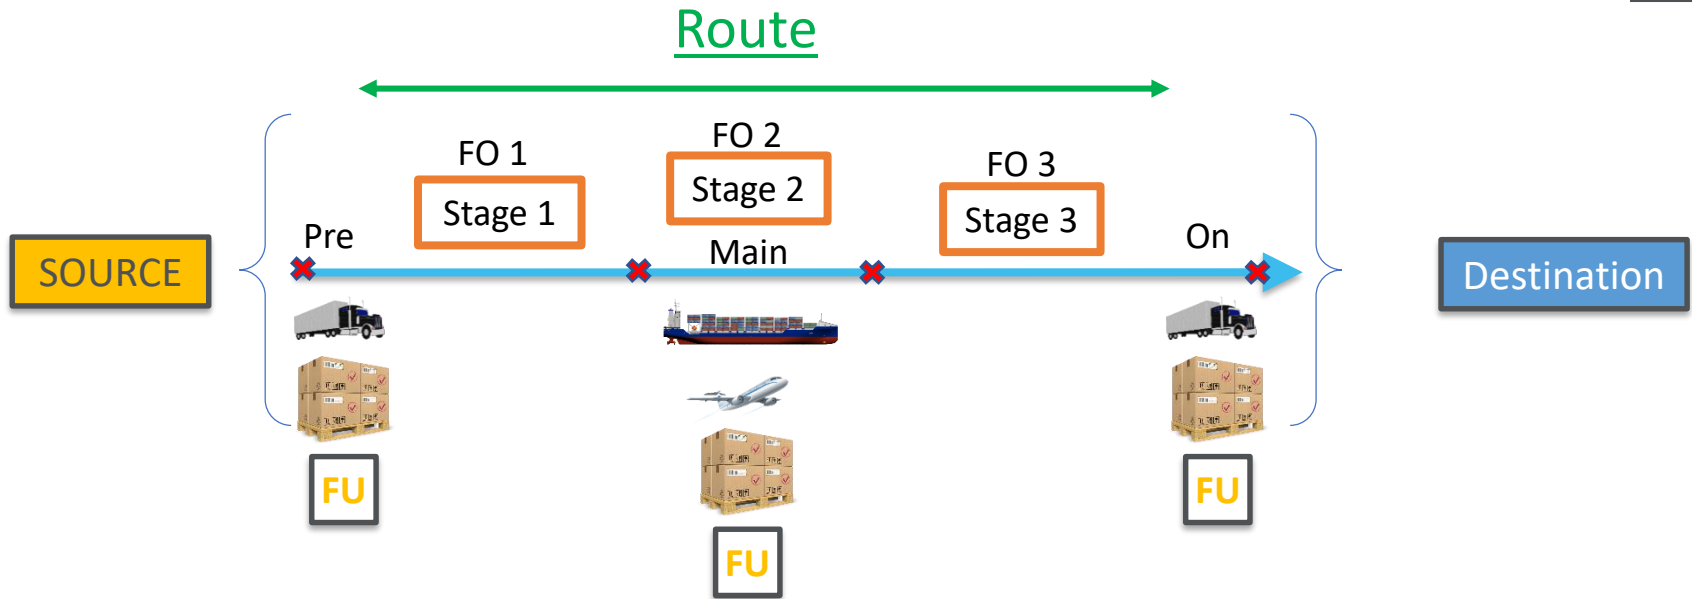

- A route is the combination of Legs/Stages connecting Source & Destination Location
- It is the complete transportation proposal resulting from planning a Freight Unit

Freight Order/s:
FOs are the Documents in TM that numerically identify each Leg/Stage planned after accepting a Route or a Transportation Proposal in the TM Cockpit

To manage the transportation planning for multiple Freight Units at once, Multiple FUs can be combined into one transportation proposal in order to plan transportation for FUs destined to the same Unloading Location.

Selecting multiple FUs will have Umoja generate Transportation Proposals with Stages/Lanes for the specific Routes found between various Loading and Unloading Locations. This format of planning transportation, has restrictions.

Consolidation Pre-Requisites:

- A. Based on Dates = Not more than 7 days apart
- B. At least one common leg

Goods being transported from A to B or C to D can share the same Lanes/Stages and thus be transported together
To do this Accept Routes in order to more efficiently manage transportation by combining Legs/Stages.

This format of planning transportation, has its restrictions.

Consolidation Pre-Requisites:

- A. Based on Dates = Not more than 7 days apart

SOW – STATEMENT OF WORK

SOW

Freight
Order

A “**Statement Of Work**” document (SOW) can be downloaded from each Freight Order. The SOW serves as an input for the Freight Procurement phase.

- The **SOW** includes all the Freight Orders, Inbounds, Outbounds, Purchase Orders, and Stock Transport Orders related to the same Shipment.

CCP – EVENT MANAGEMENT (CARRIERS)

CCP

CCP

CCP is the Carrier Collaboration Portal Carriers will manage the Freight Orders they are responsible for. They will be able to submit events, add notes and upload attachments:

- ✓ Examples of **Events**:
 - ✓ **Planned**: Loading Start/End, Departure, Arrival, etc.
 - ✓ **Unexpected**: Delay, Damage, etc.
- ✓ Examples of **Attachments**: Packing List, Bill of Lading, Proof of Delivery, etc.
- ✓ Examples of **Notes**: Loading Successful

All Events/Attachments/Notes submitted via CCP are displayed in TM.

Determine what Freight Orders are managed by Vendors, Freight Forwarders in CCP or Receiving Plant in TM

FCA/EXW/DAP incoterms for INTER Mission Transfers

DAP incoterm for INTRA Mission Transfers

Determine if Receiving Plant and/or Shipping Plant Manage Events and for which Freight Orders

For this case it is always the Receiving Plant that manages Freight Orders

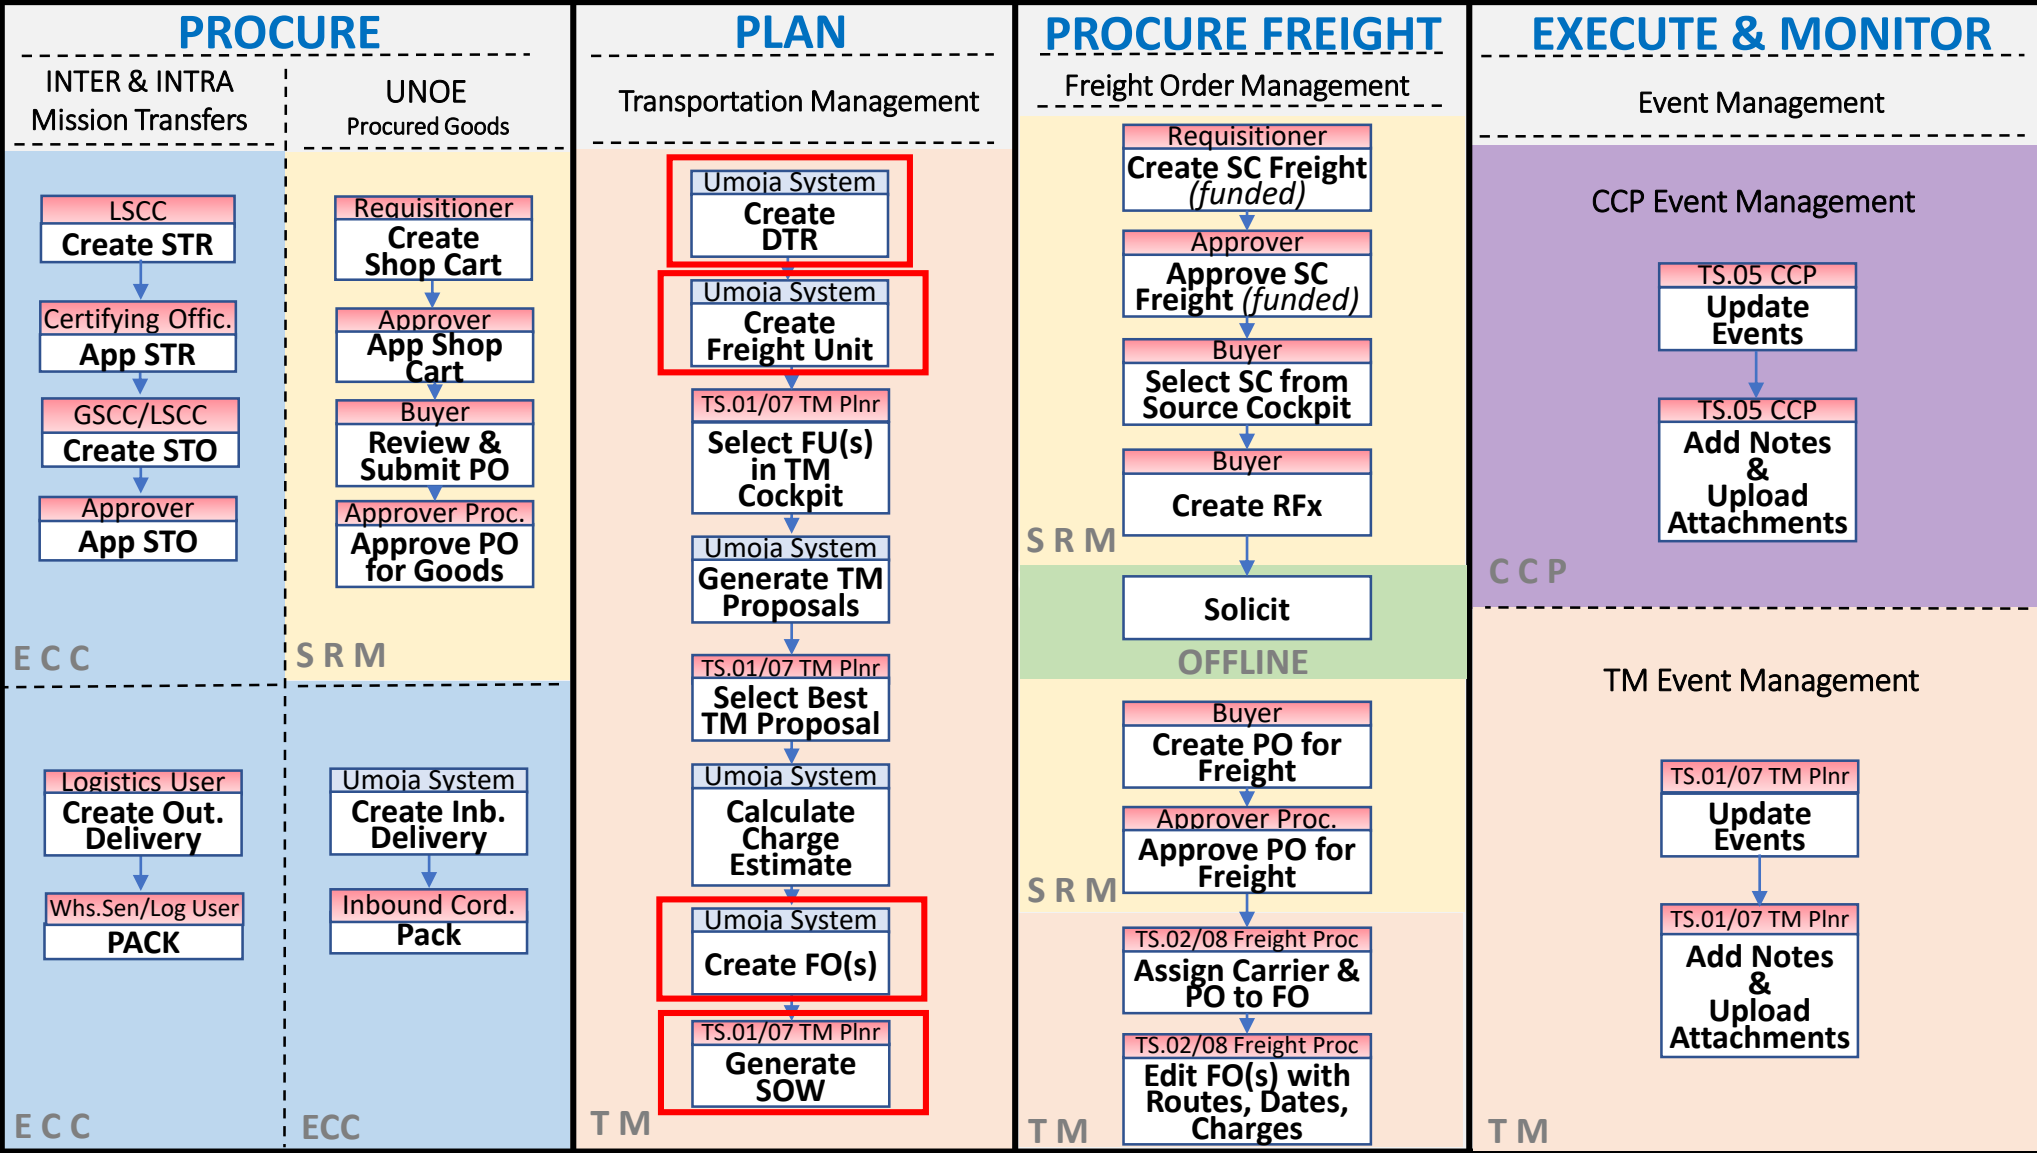

INTER Mission Transfer

*Incoterm is not a commercial agreement; it indicates which plant will Manage FUs and FOs
