DEPARTMENT OF OPERATIONAL SUPPORT

TM END to END – INTER & INTRA MISSION TRANSFERS

Main purpose of this presentation is:

- To identify key differences between INTER and INTRA mission transfers when Managing Transportation in TM
- To describe the steps involved in STR/STO for INTRA & INTER mission transfers & the derivations in the TM system impacting the Receiving/Sending Plants at the Delivery Based Transfer Requirement, Freight Unit and Freight Order Level
- To understand key TM Processes impacted by INTRA & INTER Mission Transfers:
    - Manage Transportation of INTRA & INTER Mission Transfers
    - Manage Freight Orders generated from Transportation Planning of Intra & Inter Mission Transfers
    - Manage Events

STR/STO – ROLES AND RESPONSIBILITIES in TM

- TS.01 : Planner and Execution (UNOE-Goods PO/COE/TROOPS)
- TS.02 : Freight Procurement (UNOE Goods PO/COE/TROOPS)
- TS.03 : TM Display All (UNOE Goods PO/COE/TROOPS)
- TS.04 : TM Master Data
- TS.05 : CCP Role for Vendor and Freight Forwarder Contacts
- TS.06 : TM Production Support Role
- TS.07 : TM STO Transportation Planner
- TS.08 : TM STO Freight Procurement
- TS.09 : TM STO Display All

Introduced for STOs

STR/STO – ROLES AND RESPONSIBILITIES in TM

STOCK TRANSFER WITHIN MISSION/PLANT

One-Step Transfer – Physical Proximity *(Same Fund / Funds Center)*

Two-Steps Transfer – Short Distance *(Same Fund / Funds Center)*

ZINT - Intra-mission STO – Track Shipment *(Same Fund / Funds Center)*

STOCK TRANSFER BETWEEN DIFFERENT MISSIONS/PLANTS

Between Missions Non-Budget Relevant & UN Reserve Stock (ZNBD)

Between Missions Budget Relevant (ZBUD)

From Strategic Deployment Stock (ZSDS)

INTER/INTRA – PLANNING PROFILE *(DAP/EXW/FCA)*

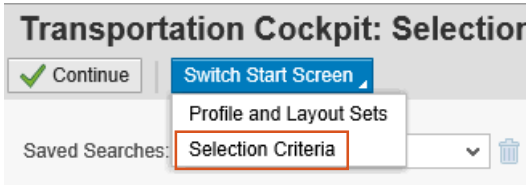
TS.07 TM Plnr
Select FU(s) in TM Cockpit

T
M

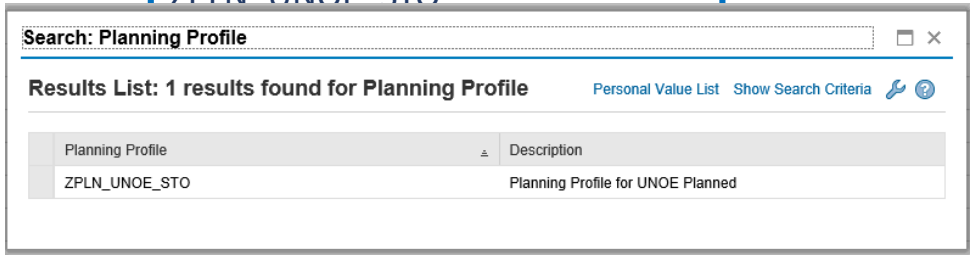
INTER & INTRA **DAP, EXW** & **FCA** Incoterms scenarios, need to be planned by the STO TM Planner (TS.07).

Freight Units linked to the **Planning & Execution Group** of the Receiving or Shipping Plants in TM appear in the **Transportation Cockpit**:

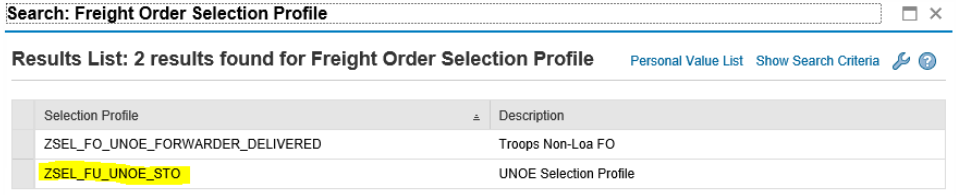
- The TM Planner chooses the type of Profile to view and Layout Settings in the Planning Profile screen
- Or selects the Profile and Layout Set defaulted according to role to view the FUs by **Incoterm** *(DAP, EXW and non-DAP/EXW)*



Planning Profile: ZPLN_UNOE_STO



Freight Unit Selection Profile: ZPLN_UNOE_STO



INTER/INTRA – Transportation Cockpit *(DAP/FCA/EXW) Scenarios*

TS.07 TM Plnr

Select FU(s) in TM Cockpit

T M

The TS.07 combines FUs according to Origin, Destination and Delivery Dates. A 7 day date range is considered when combining of FUs. Anything beyond that will result in a non-possible combination.

INTER Mission Transfers

For DAP and FCA scenarios, the **Shipping Plant**'s TS.07 manages the FUs and plans transportation proposals from origin to destination.

For EXW scenarios, the **Receiving Plant**'s TS.07 manages the FUs and plans transportation proposals from origin to destination

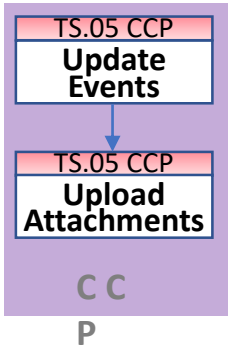
CC

INTRA/INTER - Event Submission in CCP



Carriers are provided with login credentials for the Umoja Carrier Collaboration Portal (**CCP**).

In CCP, Carriers will see the Freight Orders they are responsible for. They will be also able and responsible for submitting events related to those Stages and upload pertinent documentation as attachments:

- ✓ Examples of **Events**:
  - ✓ **Planned**: Loading Start/End, Departure, Arrival, etc.
  - ✓ **Unexpected**: Delay, Damage, etc.
- ✓ Examples of **Attachments**: Packing List, Bill of Lading, Proof of Delivery, etc.

The process of Submitting Events should be repeated for every Shipping Plant's Freight Orders as well as Receiving Plant's FOs until the Event "**Proof Of Delivery**" is submitted. The submission of this event will set the status of all the Freight Orders to Completed.

All Events/Attachments submitted via CCP are displayed in TM. In case the Carrier cannot connect to CCP, Umoja roles "**TS.07 TM STO Transportation Planner**" can update the related events/attachments directly in the TM module. These Events/Attachments are also displayed in CCP

Once the first event is submitted, the FO execution status changes to "**In Execution**". No changes in the route are further allowed.

In case of INTRA mission scenarios (only DAP incoterm), "**TS.07 TM Planner**" will update the related events/attachments directly in the TM module too.
