# TRANSPORTATION MANAGEMENT ENTERPRISE ROLES

## **UNOE**

**TS.01** TM TRANSPORTATION PLANNER

**TS.02** TM MANAGE FREIGHT ORDER

**TS.03** TM DISPLAY ALL

## **INTER & INTRA Mission Transfers**

**TS.07** TM STO TRANSPORTATION PLANNER

**TS.08** TM STO FREIGHT PROCUREMENT

**TS.09** TM STO DISPLAY ALL

**TS.04** TM MASTER DATA MAINTAINER

**TS.05** COLLABORATION PORTAL

**TS.06** TM EM PRODUCTION SUPPORT

# TRANSPORTATION MANAGEMENT ENTERPRISE ROLES

## TS.01 TM TRANSPORTATION PLANNER

Transportation Planner for UNOE is responsible for planning the movement of goods purchased and delivered by vendors (e.g. under Incoterms such as EXW, FCA, etc. for virtual delivery) from the delivery location to the destination.

- Display / Query DTR (UNOE). Change / Display / Query Freight Unit (FU). Plan / Change / Display / Query Freight Orders (FO)
- Allows the user to estimate the charges, download and print preview the statement of work (SOW)
- Allows the user to submit expected and unexpected events against the freight order in TM system.

## TS.02 TM MANAGE FREIGHT ORDER

Manage Freight Order role in Transportation Management (TM) enables the user to display, amend, update and enter events in a Freight Order The TM Manage Freight Order (TS.02) role provides access to the below functions:

- Display / Query **DTR**. Change / Display / Query **Freight Orders**. Change / Display / Query **Freight Units**

## TS.03 TM DISPLAY ALL

The TS.03 TM Display All provides display and query functions only. In Umoja, the TM Display All Enterprise role in TM provides access to the below Functions:

- Display / Query DTR. Display / Query **Freight Unit**: Display / Query **Freight Orders**: Display events against the freight order:

# TRANSPORTATION MANAGEMENT ENTERPRISE ROLES

## TS.07 TM STO TRANSPORTATION PLANNER

The TS.07 STO Transportation Planner enterprise role in Transportation Management (TM) enables the user to plan, organize and optimize the movement of freight and personnel to be undertaken by freight forwarders, third party logistics providers, or other resources contracted by the UN in execution of a Stock Transportation Order (STO). The STO may be for movements inter-mission i.e. between different missions or for intra-mission movements between different locations.

Display / Query Delivery-based Transportation Requirement-DTR. Create / Change / Display / Query Forwarding Order-FWO (COE/Troops). Change / Display / Query Freight Unit (FU). / Change / Display / Query Freight Orders (FO). Submit events against the freight order

**TS.08 TM STO FREIGHT PROCUREMENT**The TS.08 TM STO Freight Procurement enterprise role in Transportation Management (TM) enables the user to display, amend, update and enter events in a Freight Order for a STO freight movement undertaken by freight forwarders, third party logistics providers, or other resources contracted by the UN.

Display / Query DTR. Change / Display / Query Freight Orders. Change / Display / Query Freight Units. Submit events against the freight order

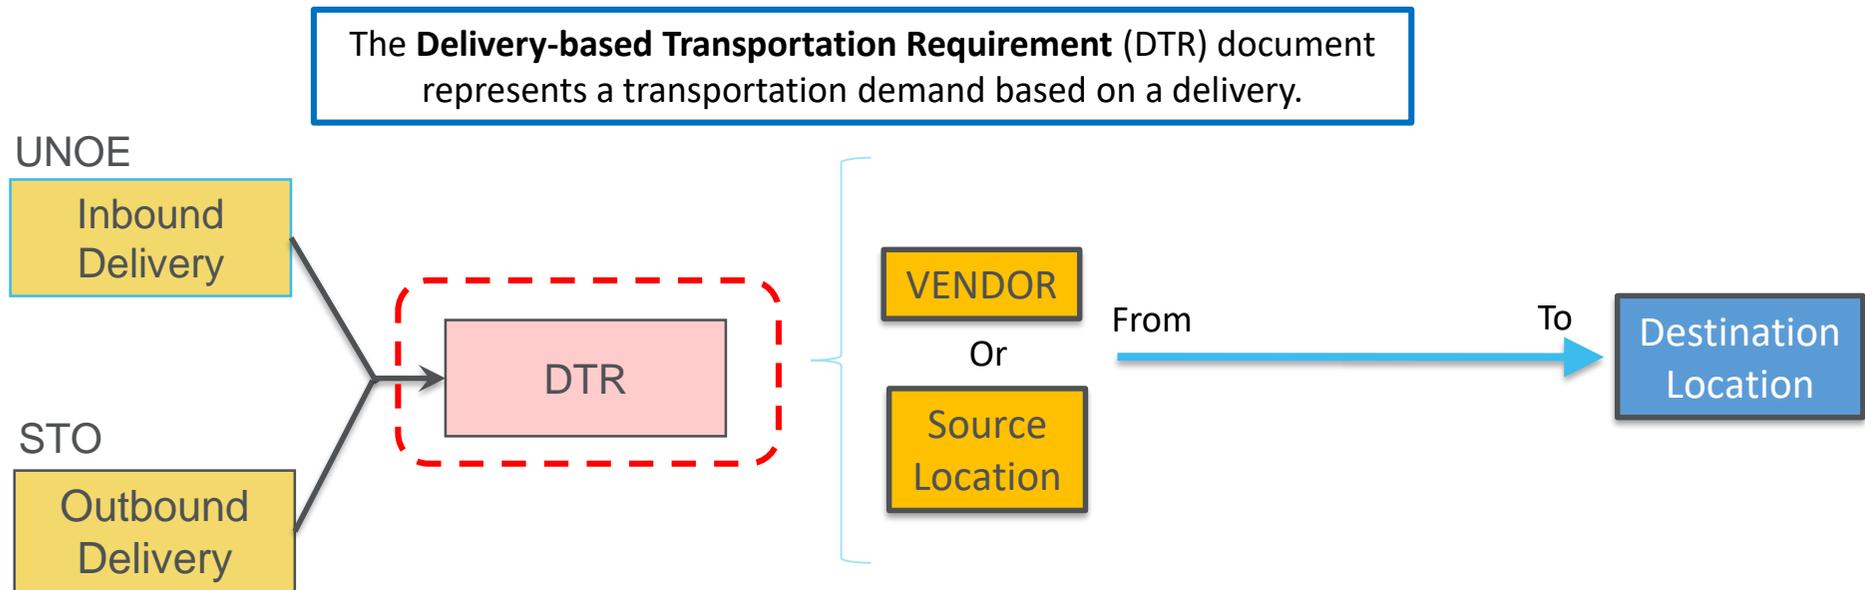

## TS.09 TM STO DISPLAY ALL

The TS.09 TM STO Display All provides display and query functions only. In Umoja, the Transportation Management STO Display Enterprise role in TM provides access to the following Functions: Query OBD. Display / Query DTR for Inter and/or Intra-mission movements. Display / Query Forwarding Order (COE/Troops). Display / Query Freight Unit. Display / Query Freight Orders. Display events against the freight order

# DTR – DELIVERY BASED TRANSPORTATION REQUIREMENT

Once the **Inbound/Outbound Delivery** is created in ECC, the system automatically generates the following document in TM: a **Delivery-based Transportation Requirement (DTR)**

With the current system configuration, there is a “**1 to 1 relationship**” between INB & OBD with DTR :  
1 Inbound/Outbound Delivery – 1 Delivery-based Transportation Requirement

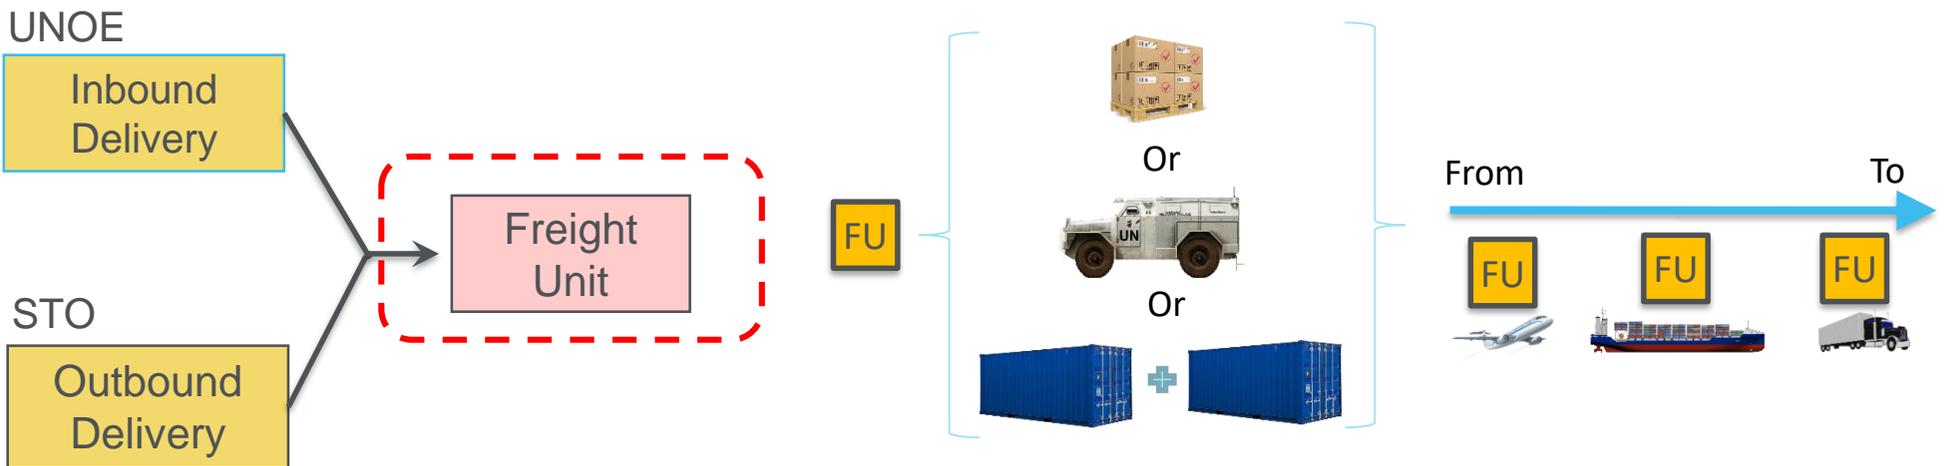

# FU – FREIGHT UNIT DOCUMENT

Once the **Inbound Delivery** & **Outbound Delivery** documents are created in ECC, the system automatically creates the following documents in TM: a **Freight Unit (FU)**.

With the current system configuration, there is a “**1 to 1 relationship**” between INB & OBD with DTR & FU: 1 Inbound/Outbound Delivery – 1 Freight Unit.

A **Freight Unit (FU)** represent a set of goods that are transported together across the entire transportation chain

# TM – TRANSPORTATION COCKPIT – MANAGING FREIGHT UNITS

Freight  
Unit

The **Transportation Cockpit** allows TS.01 & TS.07 to Manage Transportation for Freight Units and generate Transportation Proposals

## Transportation Cockpit:

Freight Unit Stages (25)

Split/Merge | Stages | Create Capacity Document | Create Multiple Capacity Documents | Remove Capacity Document

The transportation planning for a single Freight Unit is the simplest way of planning transportation. Selecting a single FU will have Umoja generate Transportation Proposals with Stages/Lanes for the specific Route found between Loading Location and Unloading Location.

# TM– PLANNING PHASE – Routes, Lanes, Stages, FOs

Freight  
Order

The screenshot shows a software interface for 'Transportation Proposals'. On the left, a 'Document Hierarchy' tree is visible with the following structure:

- Transportation Proposal 1 (highlighted with a blue box)
  - Freight Unit 4100001238 (highlighted with a red box)
    - Stage 00001 (highlighted with an orange box)
      - Stage 00002 (highlighted with an orange box)
      - Stage 00003 (highlighted with an orange box)
      - Stage 00004 (highlighted with an orange box)

On the far left, a list of Freight Order numbers is shown: 6100028354, 6100028355, 6100028356, and 6100028357. The main table displays the following data:

S..	P	M	Means of Transport	Source Location	Destination Location	Loadi...	Unloa...
			UNOE_AIR	SPITA2	SPIQA3	30.09....	07.10....
			UNOE_AIR	SPITA2	SPIQA3	30.09....	07.10....
			UNOE_TRK	SPITA2	BRINDISI_PORT	30.09....	30.09....
			UNOE_TRK	BRINDISI_PORT	BRINDISI_AIRPORT	30.09....	30.09....
			UNOE_AIR	BRINDISI_AIRPORT	BAGHDAD_AIRPORT	07.10....	07.10....
			UNOE_TRK	BAGHDAD_AIRPORT	SPIQA3	07.10....	07.10....

Freight  
Unit

Transportation Proposals are organized in the following way:

**Transportation Proposal Number:**

- Identifies one of the proposals generated by TM

**Freight Unit Number:**

- Identifies the Freight Unit being planned

**Stages/Lanes + Means of Transport:**

- Identifies the number of “connections” between Source and Destination as well as the Means of Transport associated to each connection

**Route:**

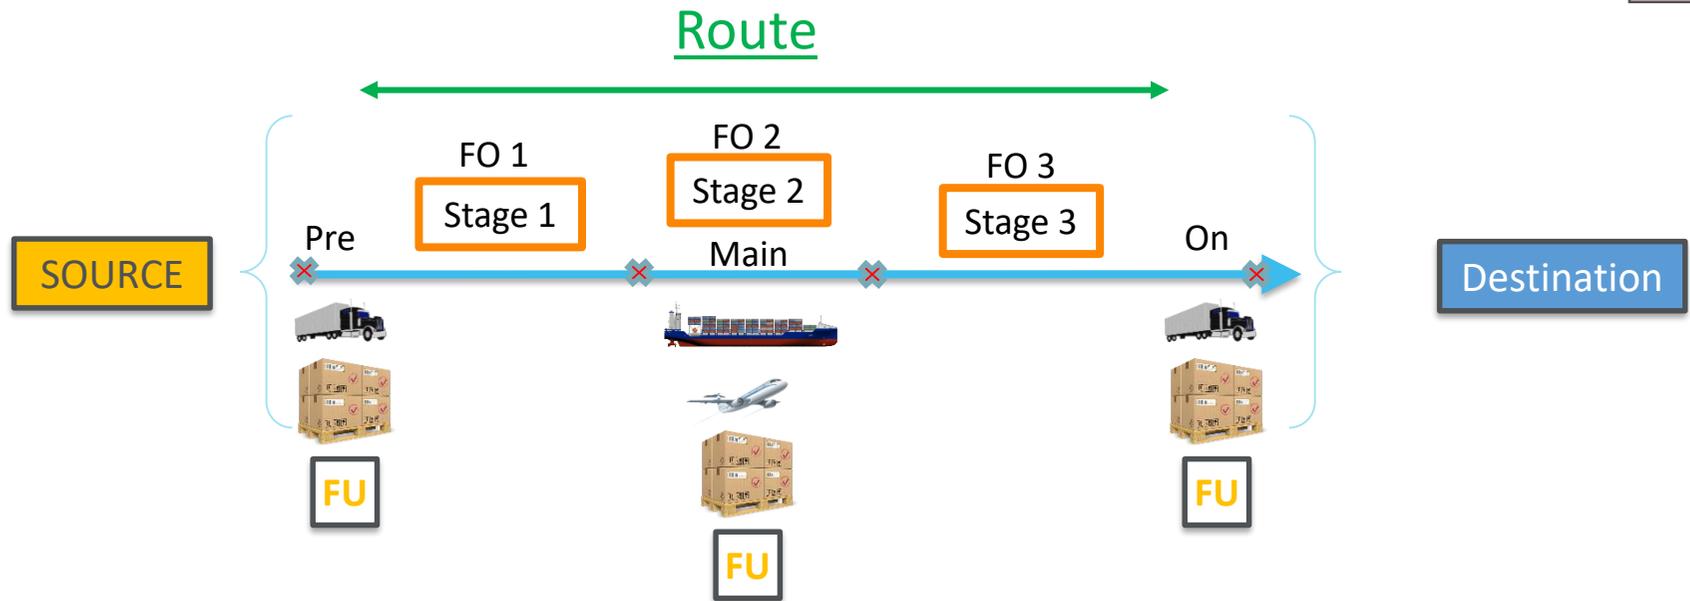

- A route is the combination of Legs/Stages connecting Source & Destination Location
- It is the complete transportation proposal resulting from planning a Freight Unit

Freight Order/s:  
FOs are the Documents in TM that numerically identify each Leg/Stage planned after accepting a Route or a Transportation Proposal in the TM Cockpit

# TM- PLANNING PHASE – Routes, Lanes, Stages, FOs

Freight  
Order

	4100000304	20		DURBAN_PORT	SPSSA1	10.03.2019	06.04.2019		

To manage the transportation planning for multiple Freight Units at once, Multiple FUs can be combined into one transportation proposal in order to plan transportation for FUs destined to the same Unloading Location.

Selecting multiple FUs will have Umoja generate Transportation Proposals with Stages/Lanes for the specific Routes found between various Loading and Unloading Locations. This format of planning transportation, has restrictions.

Consolidation Pre-Requisites:

- A. Based on Dates = Not more than 7 days apart
- B. At least one common leg

# TM– PLANNING PHASE – COMBINE FU ROUTES

Freight Unit

SPLIT GENERATED PROPOSAL INTO STAGES

Several Freight Units can be selected in order to combine the Stages/Legs generated in the Transportation Proposal efficiently

Freight Unit Stages (6)									
Split/Merge Stages Create Capacity Document Create Multiple Capacity Documents Remove Capacity Document									
I.	Freight Unit	Stage	P	Loading Location	Unloading Location	Earliest...	Ear...	T..	Latest...
	4100001237	10	✓	SPITA2	BRINDISI_AIRPORT	22.09.2019	00:0...	C...	23.09.2019
	4100001237	20	✓	BRINDISI_AIRPORT	BAGHDAD_AIRPORT	23.09.2019	06:0...	C...	23.09.2019
	4100001237	30	✓	BAGHDAD_AIRPORT	SPIQA3	30.09.2019	10:0...	I...	30.09.2019
	4100001236	10	✓	SPITA2	BRINDISI_AIRPORT	22.09.2019	00:0...	C...	23.09.2019
	4100001236	20	✓	BRINDISI_AIRPORT	BAGHDAD_AIRPORT	23.09.2019	06:0...	C...	23.09.2019
	4100001236	30	✓	BAGHDAD_AIRPORT	SPIQA3	30.09.2019	10:0...	I...	30.09.2019

Goods being transported from A to B or C to D can share the same Lanes/Stages and thus be transported together  
To do this Accept Routes in order to more efficiently manage transportation by combining Legs/Stages.

This format of planning transportation, has its restrictions.

### Consolidation Pre-Requisites:

- A. Based on Dates = Not more than 7 days apart

# SOW – STATEMENT OF WORK

SOW

Freight  
Order

A “**Statement Of Work**” document (SOW) can be downloaded from each Freight Order. The SOW serves as an input for the Freight Procurement phase.

- The **SOW** includes all the Freight Orders, Inbounds, Outbounds, Purchase Orders, and Stock Transport Orders related to the same Shipment.

Goods Purchase Order: 2299000001  
Inbound Delivery 180075172, 180075173  
Freight Order: 6100010624, 6100010625

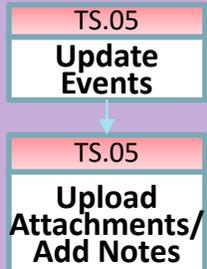

STATEMENT OF WORK

*\* Specific templates are available for UNOE, STO.*

*All linked documents are displayed in the SOW's Header.*

# CCP – EVENT MANAGEMENT (CARRIERS)

CCP

CCP is the Carrier Collaboration Portal Carriers will manage the Freight Orders they are responsible for. They will be able to submit events, add notes and upload attachments:

- ✓ Examples of **Events**:
  - ✓ **Planned**: Loading Start/End, Departure, Arrival, etc.
  - ✓ **Unexpected**: Delay, Damage, etc.
- ✓ Examples of **Attachments**: Packing List, Bill of Lading, Proof of Delivery, etc.
- ✓ Examples of **Notes**: Loading Successful

All Events/Attachments/Notes submitted via CCP are displayed in TM.

UNOE

\*Incoterm is a commercial agreement in UNOE Scenarios

# TM – EVENT MANAGEMENT (TS.01 / TS.07)

## Freight Order

The TS.01 & TS.07 submit Expected and Unexpected Events in TM, Adding Corresponding notes and attachments related to the events submitted.

TS.07 TM Plnr

Update Events

TS.07 TM Plnr

Upload Attachments/ Add Notes

FCA/FOB/DAT, EXW incoterms for UNOE Scenarios

Determine what Freight Orders are managed by Vendors, Freight Forwarders in CCP or Receiving Plant in TM

FCA/EXW/DAP incoterms for INTER Mission Transfers

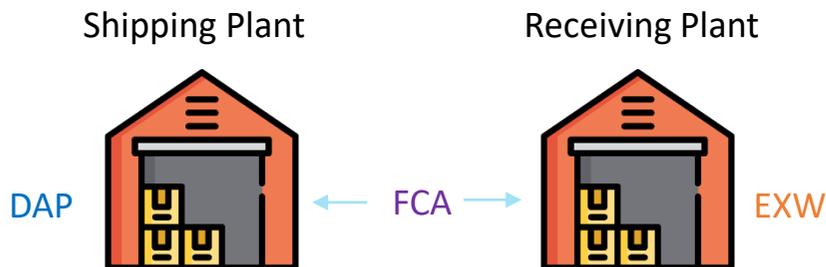

DAP incoterm for INTRA Mission Transfers

Determine if Receiving Plant and/or Shipping Plant Manage Events and for which Freight Orders

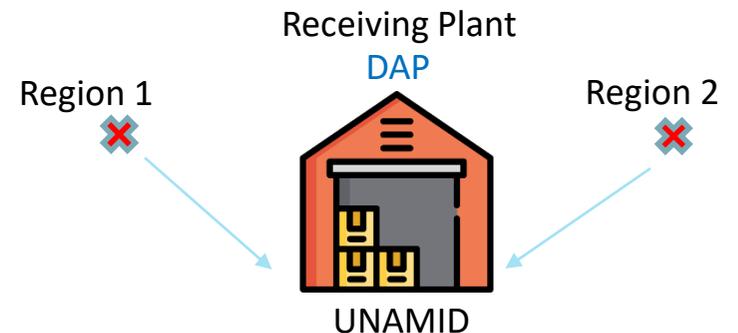

For this case it is always the Receiving Plant that manages Freight Orders

## INTER Mission Transfer

\*Incoterm is not a commercial agreement; it indicates which plant will Manage FUs and FOs

## INTRA Mission Transfer

# ADVANCED PLANNING

## Transportation Planning and Management and Track & Trace (TPTM – T&T project)

Multiple FUs can be consolidated for Route Efficiency

Several Freight Units can be selected regardless of Unloading Location in order to combine Routes efficiently.

Goods being transported from A to B or C to D can share the same Lanes/Stages and thus be transported together by combining routes in order to more efficiently manage transportation. This format of planning transportation, has its restrictions.

### Consolidation Pre-Requisites:

- A. Based on Dates = Not more than 7 days apart

# UNOE END TO END

## **Transportation Planning and Management and Track & Trace (TPTM – T&T project)**

Elena Carrasco

UCS Training Team

Tuesday, October 22, 2019

# UNOE – PROCURE PHASE – SHOPPING CART & PURCHASE ORDER

- [Shopping Cart]: Contract Catalog will be used as preferred option. If so, same PID will be offered with different Incoterms (hence, different prices).
- [Shopping Cart]: Incoterm terms from contract catalog are not picked up in the Shopping Cart line. If populated, it needs to be inserted manually. Incoterm key shall be selected by using Matchbox. Location is free text
- [Shopping Cart]: Purchasing Group (SRM) will default the Planner Group (TM) that will have visibility on the DTR to be planned. Purchasing group and planner group are plant based.
- [Shopping Cart]: For goods, no freight line should be created. Freight Shopping Cart and Purchase Order will be created separately.
- [Shopping Cart]: PO Delivery Address/ Performance Location (SRM) becomes Destination Location in the Freight Unit (TM). Umoja TM will calculate the last leg according to the destination set as PO Delivery Address/ Performance Location
- Selecting the Supplier in SRM will allow the Supplier to submit the related transportation events in the Carrier Collaboration Portal (CCP)

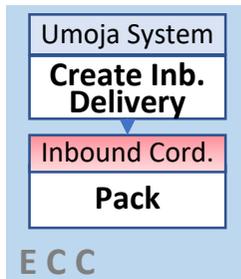

# UNOE – PROCURE PHASE – SHOPPING CART & PURCHASE ORDER

- [Purchase Order]: Buyers shall ensure the correctness of the following fields: Location, Ship- To- Address-, Purchasing Group, delivery date
- [Purchase Order]: Incoterm/ Key Location at header and item level may not be picked correctly; both incoterm key and location shall be selected by using the matchbox.
- [Purchase Order]: Selecting the Supplier in SRM will allow the Supplier to submit the related transportation events in the Carrier Collaboration Portal (CCP)
- [Purchase Order] The Delivery Date serves as the baseline date for the new Umoja Transportation Module to estimate all the other related dates (departure date, handover date, arrival at destination date, etc.) based on the UN Transportation Network Master Data
- Certifying Officers and Procurement Officers must review the accuracy of data.

# UNOE – PROCURE PHASE – INBOUND DELIVERY

- Inbound Delivery is created via batch job in **ECC** and can also be manually created.
- Product **weight & volume** is not maintained in the material master. Inbound coordinator shall update weight and volume in the **inbound delivery document manually**, based on supplier's packing list.
- Several **Packaging materials** (*material type "ZPAM"*) are available in the system
- **Packaging materials** and packing shall be **manually** inserted in the **inbound delivery document** as per vendor packing list.
- Weight, volume and packaging information duly updated in the "Inbound Delivery" will reflect the correct dimensions of the materials being shipped by creating "**Handling Units**".
- **Batch managed** materials (e.g. vaccines and medical, rations, ammunition) are around 1100PIDs. They need to be assigned in batches by editing the Inbound Delivery document, prior to packing.
- At the moment vendors are onboarded on **EDI**, the packing details will come automatically with the Advanced Shipping Notice (**ASN**).

# UNOE – PROCURE PHASE – DTR & FREIGHT UNIT

Umoja System  
Create  
DTR

Umoja System  
Create  
Freight Unit

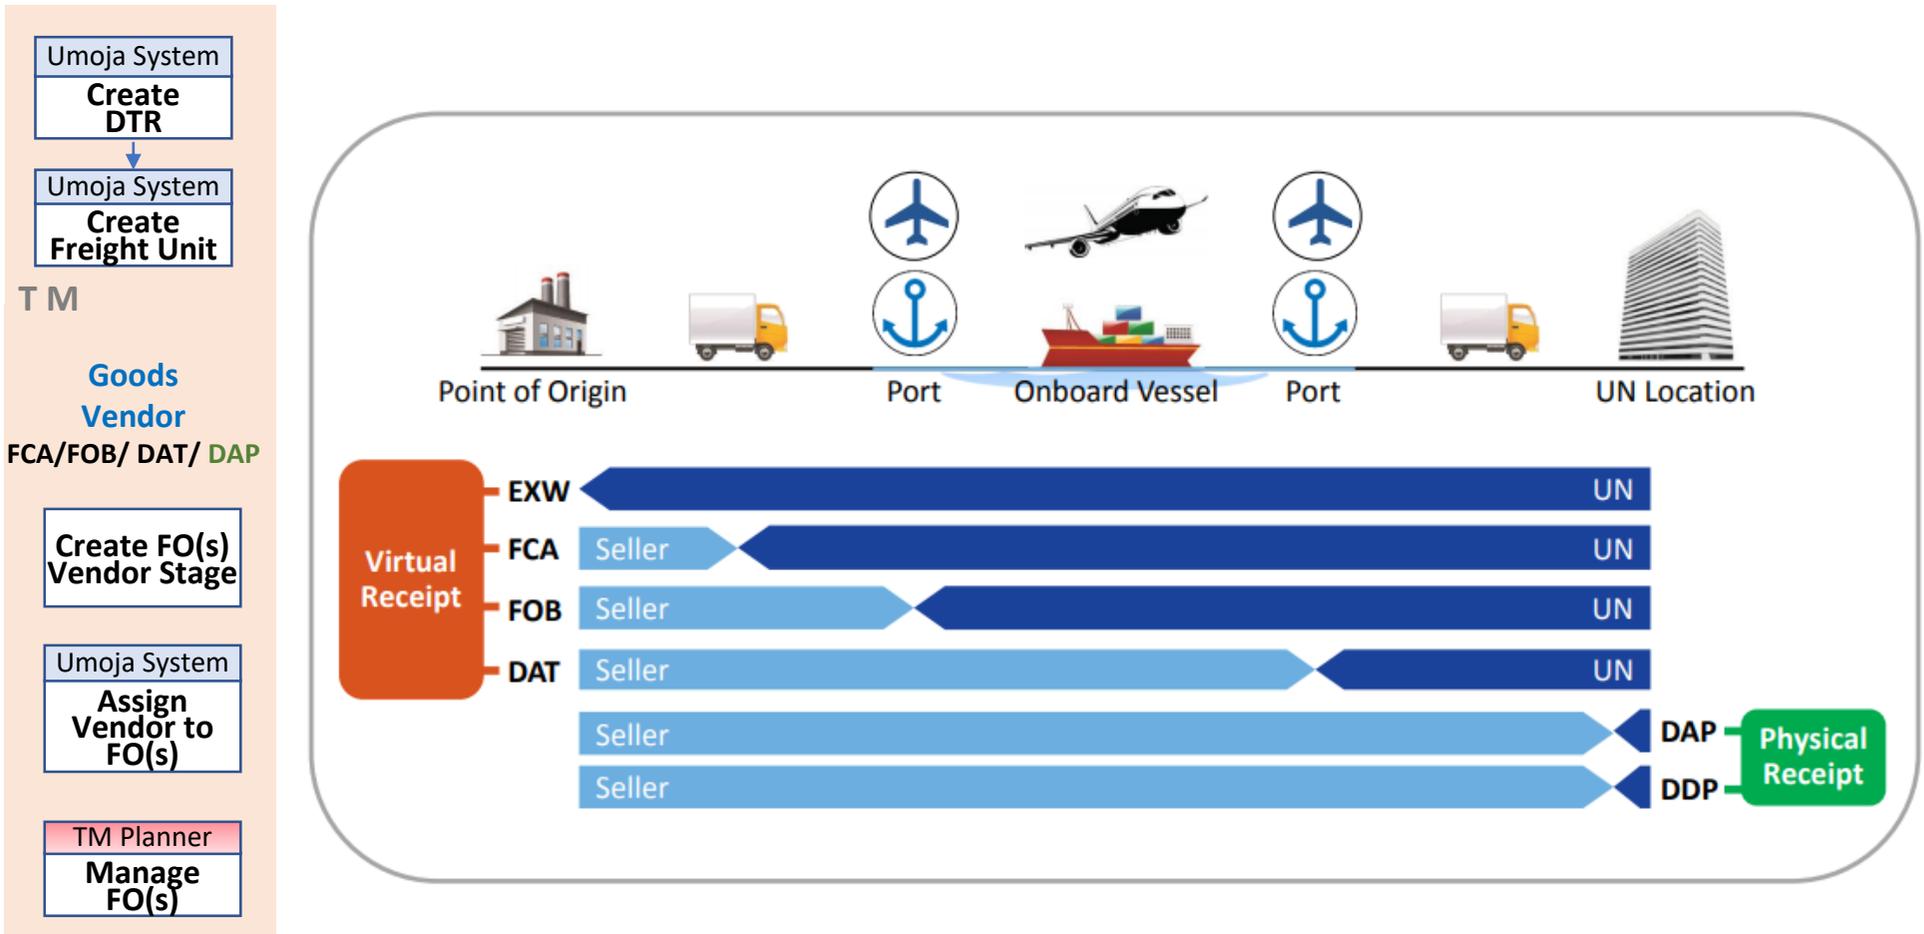

TM

- Once the **Inbound Delivery** (IBD) is created in **ECC**, the system automatically creates the following documents in **TM**: a **Delivery-based Transportation Requirement** (DTR) and a **Freight Unit** (FU).
- Both the DTR and the FU are visible in the Inbound Delivery (**ECC**) by using the “**TM Status**” tab.

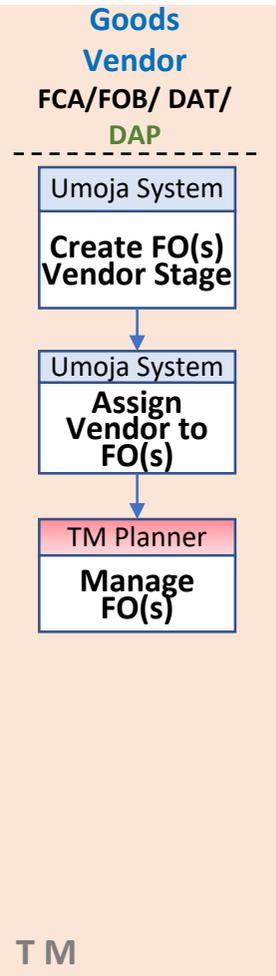

ERP-TM Document Flow	ERP Doc	Quantity	Unit	Status	BTD ID	BTD Descr.	BTD Cat.	BTD Cat.
▼ Inbound Delivery	180075157			➔	180075157	Inbound Delivery 180075157		
▼ Delivery-Based Transportation Requirement	180075157			➔	1100000099	DTR for UNOE 1100000099 (Inbound Delivery 180075157) 02	02	Delivery-Based Tr
▼ Inbound Delivery Item	180075157	2	EA	➔	1100000099	DTR for UNOE 1100000099 (Inbound Delivery 180075157) 02	02	Product
▼ Freight Unit	180075157			➔	4100000395	UNOE Planned Frt Unit: 4100000395	FU	Freight Unit

- With the current system configuration, there is a “**1 to 1 relationship**” between IBD, DTR & FU: 1 Inbound Delivery – 1 Delivery-based Transportation Requirement – 1 Freight Unit.
- The **Delivery-based Transportation Requirement** (DTR) document is the representation in **TM** of the **ECC** Inbound Delivery document.
- A **Freight Unit** (FU) represent a set of goods that are transported together across the entire transportation chain. The following data is available in the FU document:
  - Items
  - Transportation stages
  - Document flow
  - Status information

# UNOE – PLAN PHASE – Goods vendor vs Freight Forwarder

# UNOE – PLAN PHASE – GOODS VENDOR STAGE

- In a UNOE scenario, the Goods Vendor stage applies to **FCA/ FOB/ DAT & DAP** Incoterms. In this stage the Goods Vendor is responsible for delivering the items to the agreed location.
- Based on the **TM Transportation Network** (Master Data), the system selects the default route between the vendor location and the delivery location and creates as many **Freight Orders** as legs in the route.
- The system automatically assigns the Goods Vendor (*e.g. Toyota*) as **Carrier** to these newly created Freight Orders.
- These automatically created Freight Orders are in “**Ready for Execution**” status allowing the Goods Vendor to connect to the Carrier Collaboration Portal (**CCP**) to submit the events related to each FO (*i.e. leg*).
- Should the automatically created Freight Orders differ from the **vendor’s actual route**, the TM Planner can delete and re-create them to reflect the real route and to facilitate the insertion of events at a later stage.

# UNOE – PLAN PHASE – FREIGHT FORWARDER STAGE – 1/4

## Freight FW Stage

EXW / FCA/ FOB/ DAT

TM Planner

Select FU(s) in TM Cockpit

- In a UNOE scenario, the Freight Forwarder stage applies to **EXW & FCA/ FOB/ DAT** Incoterms. In this stage the Freight Forwarder is responsible for delivering the items to the final destination.
- Freight Units appear in the **Transportation Cockpit** filtered by **Profile** (*EXW vs non-DAP/EXW*):.

Profile and Layout Sets (4)

Description	N...	Freight Unit Selection Profile	Transportation Unit Selection Profile
UNOE DAP 2		ZSEL_FU_UNOE_SUPPLIER_DELIVERED	ZSEL_FO_UNOE_SUPPLIER_DELIVERED
UNOE non-DAP/EXW Supplier Stage		ZSEL_FU_UNOE_SUPPLIER_DEL_STAGE	ZSEL_FO_UNOE_SUPPLIER_DELIVERED
UNOE EXW		ZSEL_FU_UNOE_EXW_FORWARDER_DELIVERED	ZSEL_FO_UNOE_FORWARDER_DELIVERED
UNOE non-DAP/EXW - FFW Stage		ZSEL_FU_UNOE_FORWARDER_DELIVERED	ZSEL_FO_UNOE_FORWARDER_DELIVERED

Goods Vendor Stage {

- DAP
- FCA, FOB, DAT

Freight FW Stage {

- EXW
- FCA, FOB, DAT

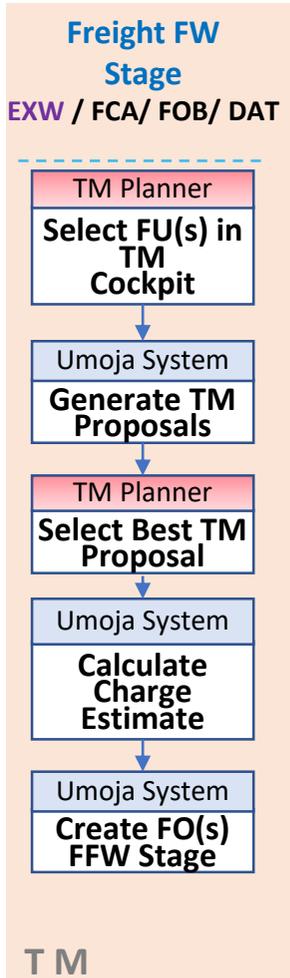

Several Freight Units (FUs) with the same pick-up and destination locations can be **consolidated** to be transported together. There is a **time window** (*currently 7 days*) that allows multiple FUs to be consolidated.

Freight Unit Stages (10/12)

Late Changes:

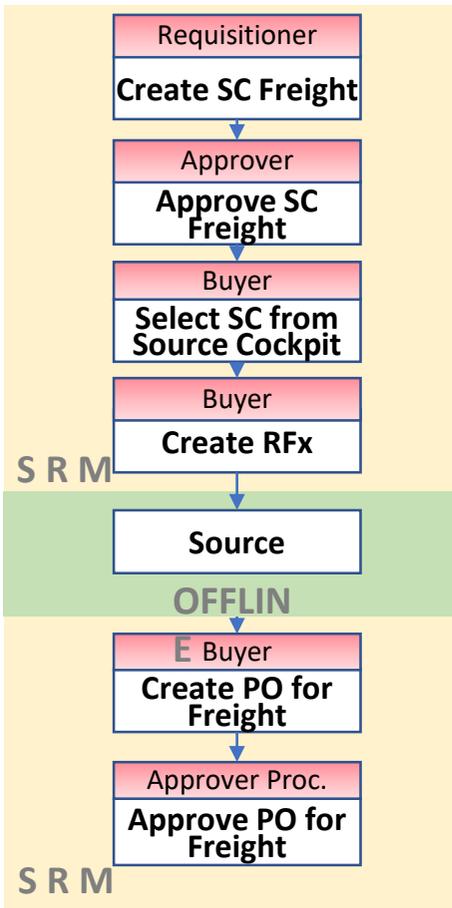

# UNOE – PLAN PHASE – FREIGHT FORWARDER STAGE (EXW-FCA) - 4/4

- A “**Statement Of Work**” document (SOW) can be downloaded from each Freight Order. The SOW can be printed and **edited**. The SOW serves as an input for the Freight Procurement phase.
- The **SOW** includes all the Freight Orders related to the same Shipment.

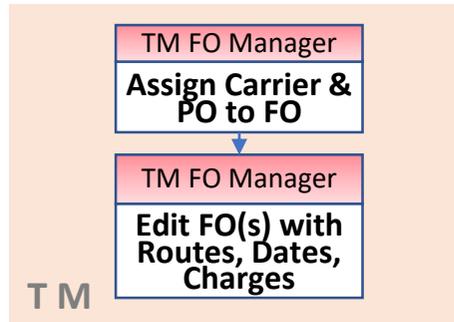

*\* Specific templates are available for UNOE, COE & Troops.*

# UNOE – PROCURE FREIGHT PHASE – 1/2

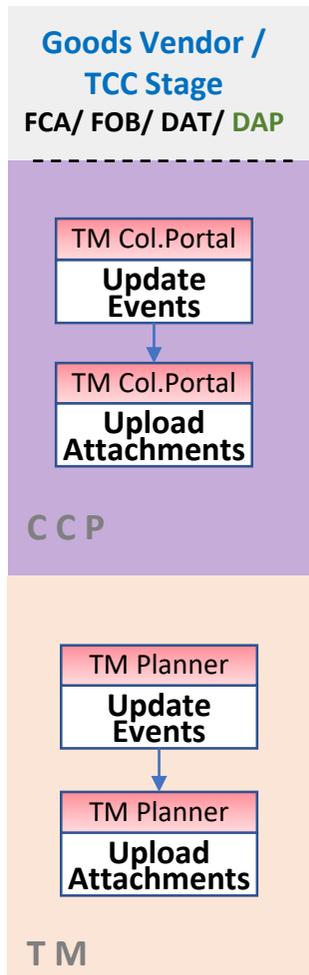

- The Freight Procurement steps in the system remain very similar as they currently are.
- Below some items to be considered with the TM implementation:
  - ✓ Freight Services are requested in a separate Shopping Cart (*no more \$1 line for freight in the goods shopping cart*).
  - ✓ The SOW to be attached in the Freight Shopping Cart can be downloaded directly from Umoja TM.
  - ✓ TM is now the single source of information for the transportation requirements.

# UNOE – PROCURE FREIGHT PHASE – 2/2

- Once the freight services have been awarded, the Freight Order in **TM** has to be updated with the **selected carrier** and the related **purchase order number**.
- Once the carrier is assigned in the FO, the FO execution status changes to “**Ready for Execution**” allowing the freight forwarders to submit the related events.
- Moreover the Freight Order needs to be updated with:
  - ✓ **Actual Route:** If the route selected by the carrier is different to the planned route, the FO has to be updated with the new route as it is used to report events.
  - ✓ **Actual Dates:** The planned dates need to be updated in the Freight Order based on the information provided by the Freight Forwarder .
  - ✓ **Actual Charges:** The Freight Order charges have to be updated with the actual ones appearing in the Freight Purchase Order. The system allows comparing the estimated charges and the actual charges for reporting purposes.

# UNOE – EXECUTE & MONITOR PHASE - GOODS VENDOR STAGE

- Goods Vendors will be provided with login credentials for the Umoja Carrier Collaboration Portal (CCP).
- In CCP, Goods Vendors will see the Freight Orders they are responsible for the transportation. They will be able to submit events and upload attachments:
  - ✓ Examples of **Events**:
    - ✓ **Planned**: Loading Start/End, Departure, Arrival, etc.
    - ✓ **Unexpected**: Delay, Damage, etc.
  - ✓ Examples of **Attachments**: Packing List, Bill of Lading, Proof of Delivery, etc.
- All Events/Attachments submitted via CCP are displayed in TM.
- In case the vendor cannot connect to CCP, Umoja role “**TS.01 TM Planner and TS.02 Manage Freight Orders**” can update the related events/attachments directly in the TM module. These Events/Attachments are also displayed in CCP
- Once the first event is submitted, the FO execution status changes to “**In Execution**”. No changes in the route are further allowed.
- Other Umoja follow on documents:
  - **DAP**: Physical Goods Receipt
  - **FCA**: Virtual Goods Receipt & Stock Transport Order

  - **Follow-on documents** : Physical Goods Receipt

# UNOE INTEGRATION

## Transportation Planning and Management and Track & Trace (TPTM – T&T project)

Elena Carrasco

UCS Training Team

Tuesday, October 22, 2019

# 1 PURCHASING FREIGHT SERVICES

With the adoption of the TM solution, the freight requirement (*in case UN is responsible for providing it*) shall not be included in the Goods Shopping Cart and Purchase Orders,

No \$1 line for freight services

Line Number	Item Type	Item Type	Product ID	Description	Product Category	Product Category Description	Quantity	Unit

## 2 DELIVERY ADDRESS / PERFORMANCE LOCATION

Delivery address plays a pivotal role throughout *Requisitioning- Procurement- Inbound Coordination* processes.

Therefore it is integrated in all four Umoja modules (*SRM, ECC, TM, CCP*) and in all documents (*Shopping Carts, Purchase Orders, Inbound Delivery, Delivery Transportation Requirement, Freight Unit and Freight Order*).

SRM

TM

## 5 DELIVERY DATE

Requisitioners state their desired Delivery Date and Procurement will confirm availability with the Vendor on the PO.

Purchase Order's delivery date is set at item level, and they will determine the **number** of Inbound Delivery, Delivery Transportation Requirement and Freight Unit created.

**Delivery date** at incoterm location in SRM (provided that no changes on dates are updated in the IBD document) impacts TM as it is used as baseline date to estimate all other related dates (*departure-*, *handover-*, *arrival at destination-*, *etc.*) based on the UN Transportation Network Master Data.

Line Number	Deleted	Item Type	Item Number	Product ID	Description	Product Category	Quantity	Unit	Gross Price	Currency	Per	Net Price	Option Type	Order Type	Condition	Option Status	Delivery Date
1		Material	1	2100001218	Ambulance, Armrd, Diesel, LHD, 4x4	25101700	1	EA	139,000.00	USD	1	134,830.00			MUL		20.12.2019

PO Delivery Date (SRM) defaults the FU's start date and End date (TM) TM module

**Destination**

Location: SPITA1 UNLB Brindisi  
 UNGSC / c/o Aeroporto Militare "O. Pierozzi" 1 / I-72100 Brindisi BR

Start Date (Acceptable):  00:00:00 CET

Start Date (Requested):  00:00:00 CET

End Date (Requested):  23:59:59 CET

End Date (Acceptable):  00:00:00 CET

Unloading Date:  00:00:00 CET

## 5 DELIVERY DATE

In Purchase Orders with Incoterm rules Non-DAP / Non-Exw, **Stages** tab shows two stages:

- ✓ Stage 1 is from Source Location (vendor) to the destination location (handover location) which is the Incoterm location defined in the inbound delivery document.  
The requested delivery date/time for stage 1 is defined to be the **delivery date/time set in the inbound delivery document**.
- ✓ Stage 2 is from the handover location to the shipping point address. The requested pick-up date/time on Stage 2 is successfully populated as the **delivery date/time set in the inbound delivery document** for the handover location.

# INTER/INTRA – PLANNING PROFILE (DAP/EXW/FCA)

INTER & INTRA **DAP, EXW & FCA** Incoterms scenarios, need to be planned by the STO TM Planner (TS.07).

Freight Units linked to the **Planning & Execution Group** of the Receiving or Shipping Plants in TM appear in the **Transportation Cockpit**:

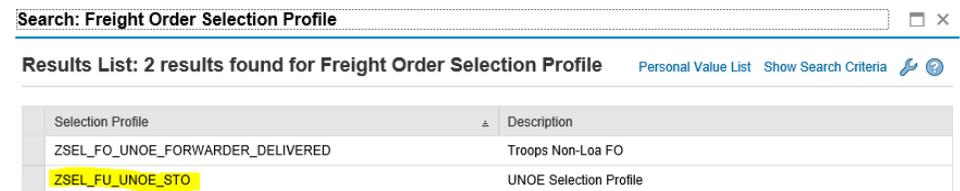

- The TM Planner chooses the type of Profile to view and Layout Settings in the Planning Profile screen
- Or selects the Profile and Layout Set defaulted according to role to view the FUs by **Incoterm** (DAP, EXW and non-DAP/EXW)

Planning Profile:  
ZPLN\_UNOE\_STO

Freight Unit Selection Profile:  
ZSEL\_FU\_UNOE\_STO

# INTER/INTRA – Transportation Cockpit (DAP/FCA/EXW) Scenarios

TS.07 TM Plant  
Select  
FU(s) in TM  
Cockpit

T M

The TS.07 combines FUs according to Origin, Destination and Delivery Dates. A 7 day date range is considered when combining of FUs. Anything beyond that will result in a non-possible combination.

**INTER  
Mission  
Transfers**

For DAP and FCA scenarios, the **Shipping Plant's** TS.07 manages the FUs and plans transportation proposals from origin to destination.

For EXW scenarios, the **Receiving Plant's** TS.07 manages the FUs and plans transportation proposals from origin to destination

# INTRA/INTER - Event Submission in CCP

Carriers are provided with login credentials for the Umoja Carrier Collaboration Portal (**CCP**).

In CCP, Carriers will see the Freight Orders they are responsible for. They will be also able and responsible for submitting events related to those Stages and upload pertinent documentation as attachments:

- ✓ Examples of **Events**:
  - ✓ **Planned**: Loading Start/End, Departure, Arrival, etc.
  - ✓ **Unexpected**: Delay, Damage, etc.
- ✓ Examples of **Attachments**: Packing List, Bill of Lading, Proof of Delivery, etc.

The process of Submitting Events should be repeated for every Shipping Plant's Freight Orders as well as Receiving Plant's FOs until the Event "**Proof Of Delivery**" is submitted. The submission of this event will set the status of all the Freight Orders to Completed.

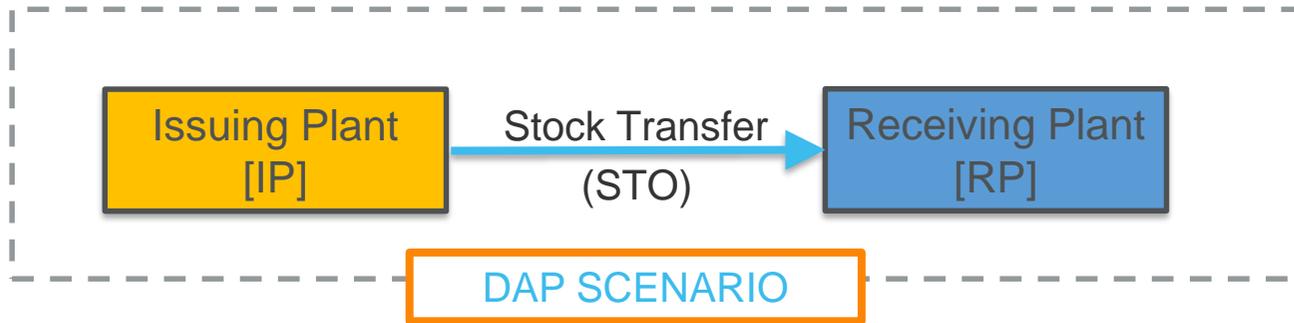

All Events/Attachments submitted via CCP are displayed in TM. In case the Carrier cannot connect to CCP, Umoja roles "**TS.07 TM STO Transportation Planner**" can update the related events/attachments directly in the TM module. These Events/Attachments are also displayed in CCP

Once the first event is submitted, the FO execution status changes to "**In Execution**". No changes in the route are further allowed.

In case of INTRA mission scenarios (only DAP incoterm), "**TS.07 TM Planner**" will update the related events/attachments directly in the TM module too.

# Transportation Management – Master Data Illustration

The UN has a contract with Caterpillar (BP#: 1110002314) to provide machinery for use by PK and SP missions.

- Items are purchased from the factory in Peoria, IL, US
- Items are shipped by truck, sea and truck to their final destination
- Incoterms EXW, FCA and DAP can apply to individual purchases

# COLLABORATION PORTAL ROLES

## TS.05 COLLABORATION PORTAL

The TS.05 Collaboration Portal enterprise role is provided to enable access to on Carrier Collaboration Portal (CCP) to perform the following:

- Query the Freight Order
- Submit/ Review and Display events corresponding to the Freight Order
- The CCP is web-based. As a technical pre-requisite, the TS.05 Collaboration Portal user requires internet access to be able to login and use the CCP.

CCP

- The Carrier Collaboration Portal (**CCP**) allows Carriers (Vendors/Freight Forwarders) to update information about the Freight Orders they are responsible for the Transportation.
- Vendors and Freight Forwarders are provided with login credentials for the Umoja Carrier Collaboration Portal.
- They will be able to submit **Expected and Unexpected Events**, add **Notes** and upload **Attachments**:
  - ✓ Examples of **Events Planned**: Loading Start/End, Departure, Arrival, etc.
  - ✓ Examples of **Events Unexpected**: Delay, Damage, etc.
  - ✓ Examples of **Attachments**: Packing List, Bill of Lading, Proof of Delivery, etc.
  - ✓ Examples of **Notes**: Loading Successful
- All Events/Attachments submitted via CCP are displayed in TM.
- In case the Carrier cannot connect to CCP, Umoja role “**TS.01/07 TM Planner**” can update the related events/attachments directly in the TM module. These Events/Attachments will also be displayed in CCP
- Once the first event is submitted, the FO execution status changes to “**In Execution**”. No changes in the route are further allowed

## Navigating the Carrier Collaboration Portal

- The Home page of the Carrier Collaboration Portal (CCP) shows the number of FOs ready for Execution.
- In this case there are 10 FOs we can report Events for. These FOs are in 'Open' status.
- Clicking on the Box with open FO or select the tab 'Freight Order Management' allows the user to navigate through the list of the FOs.

# CCP – EXECUTE & MONITOR PHASE – ADD NOTES

## Adding Note to a selected FO

- Once we select the FO, the system opens a window with information such as FO status, Means of Transport, Business Partner, etc.
- A 'Notes' box is available for communication between CCP (Good Vendors/Freight Forwarders) and TM (TM planner). The notes will be visible in the 'Notes' tag for the selected FO in TM.

## How to Submit an Expected Event in CCP

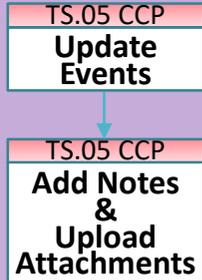

- Once we select the FO, the system opens a window with information displaying event details for Expected Events at each location.

CCP

The screenshot displays the CCP interface for a Freight Order (6100021567). The main window shows 'Location Events' for two locations: '1/2 Mombasa' and '2/2 UNMISS / UNMISS / Juba'. A red box highlights the 'Event' column in the table, which includes 'Loading Begin', 'Loading End', and 'Departure' for Mombasa, and 'Arrival at Destination' and 'Unloading Begin' for UNMISS/Juba. The table columns are: Status, Event, Planned Date/Time, Reported Date/Time, Comment, Reason, and Actions.

Status	Event	Planned Date/Time	Reported Date/Time	Comment	Reason	Actions
<input type="radio"/>	Loading Begin	February 20, 2019 7:37 AM UTC+3	<input type="text"/>	Enter your comment	<input type="text"/>	<input type="checkbox"/>

**Update Events**

TS.05 CCP  
**Add Notes & Upload Attachments**

CCP

## How to Submit an Unexpected Event in CCP

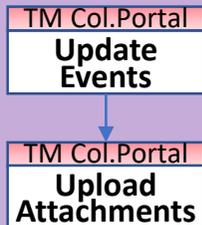

- Once Event is selected and 'Date' and 'Time' stated, the user will click on 'Confirm'

- The Expected or Unexpected Event will be updated. CCP will flag the transaction with a green checkmark under the Action Column.

Status	Event	Planned Date/Time	Reported Date/Time	Comment	Reason	Actions
✓	Departure	September 30, 2019 6:00 AM CET	Oct 1, 2019 4:05 AM CET	TEST3		✓
✓	Loading End	September 30, 2019 6:00 AM CET	Oct 1, 2019 4:06 AM CET	TEST2		✓
✓	Loading Begin	September 30, 2019 6:00 AM CET	Oct 1, 2019 4:05 PM CET	TEST		✓
✓	Cargo Information		Oct 1, 2019 4:09 PM CET	UNEXPECTED		✓

**Note:** The **Tour of Events** section in CCP allows Carriers to submit Unexpected events that occurred during travel from one location to another.

# CCP – EXECUTE & MONITOR PHASE -NOTIFICATIONS

CCP

**Email notifications** are sent automatically when some **specific events** are **reported** or **overdue**:

- **Planned Events:**

- ✓ **“Handover document”** event:

- When the event is reported an email is sent to the R&I contact in the destination Plant
- If the event is overdue more than **48 hours** (*from the planned date*) an email is sent to MovCon.

- ✓ **“Documentation Sent”** event (*only for “main carriage” leg*):

- When the event is reported an email is sent to the R&I contact in the destination Plant
- If the event is overdue more than **10 days** (*from the planned date*) an email is sent to MovCon.

- ✓ **“Documentation Complete”** & **“Custom Clearance”** events (*only for “main carriage” leg*):

- If the event is overdue more than **10 days** (*from the planned date*) an email is sent to MovCon.

- **Unexpected Events:**

- ✓ An email notification to the TM Planner, Requisitioner and R&I is sent when any of this type of events is reported (*delay, damage, loss, etc.*).
- ✓ Procurement Division will also be notified in case the unexpected event is either “Cost Change” or “Route Change”

THANK YOU!
