

Umoja Business Intelligence Advanced

Description:

A hands-on, classroom-based intermediate-to-advanced course in Umoja Business Intelligence.

Please note that activities without a specified Start Date can be taken at any time.

Abstract:

This course covers the suite of components of the Web Intelligence (WebI) tool. Advanced features of WebI are covered in detail followed by demonstrations of how to make effective use of them. The course focuses on how the WebI tools may be used for developing highly-customized reporting capabilities. Participants will gain experience building reports through both demonstrations and exercises to give hands-on experience with the creation of complex reports by utilizing the many advanced features of WebI. This course is recommended for those who intend to develop custom reports to support their own reporting requirements and/or are tasked to produce custom reports on a regular basis.

Upon successful completion, participants will be able to develop highly complex reports and receive Advanced BI Certification.

Duration: 2.5 Days

Target Audience/Eligibility: Successful completion of Umoja Business Intelligence-Foundation

Objectives: To be able to develop complex Web Intelligence Reports.

Topics Covered:

- Advanced WebI report development
- Synchronising and Merging Dimensions
- Excel as external data source
- Complex Formulas and Functions
- Dynamic Filtering using Element Links
- Creating Links to Other WebI Documents
