The Statement of Unit Requirement (SUR) Module within Uniformed Capabilities Management (UCM) initially enables Military and Police Planners to create and manage elements of SURs, specifically Annex A (Troop Strength), Annex B (Major Equipment) and Annex C (Self-Sustainment) in an enterprise platform that is directly linked to downstream processes such as: MoU management, COE inspections and verifications, troop strength reporting, calculations, claims, and payments. UCM and the SUR Module will ultimately enable:

- **SURs**
- **MoUs**
- **Verification Reports**
- **Troop Strength Reporting**
- **Claims**

### Standardization
- SUR Annexes are created from Standard Annex Templates (SATs), which will alleviate creation of annexes from scratch.
- Units’ are categorized based on pre-defined values such as Unit Type, Branch, Size, and Specialization.
- Major Equipment (ME) and Self-Sustainment (SS) requirements are determined based on details included in the COE Manual.

### Accountability
- SUR statuses and sub-statustes allow Planners to track the coordination and approval process of specific SURs.
- Audit trails display and record key user actions.

### Continuity
- SUR records and associated Annexes are preserved in the system for future Planners to easily reference.
- Quickly search, run queries, and filter records across all missions.
